

# TPU Casting Film Production Line

## TPU流延膜生产线

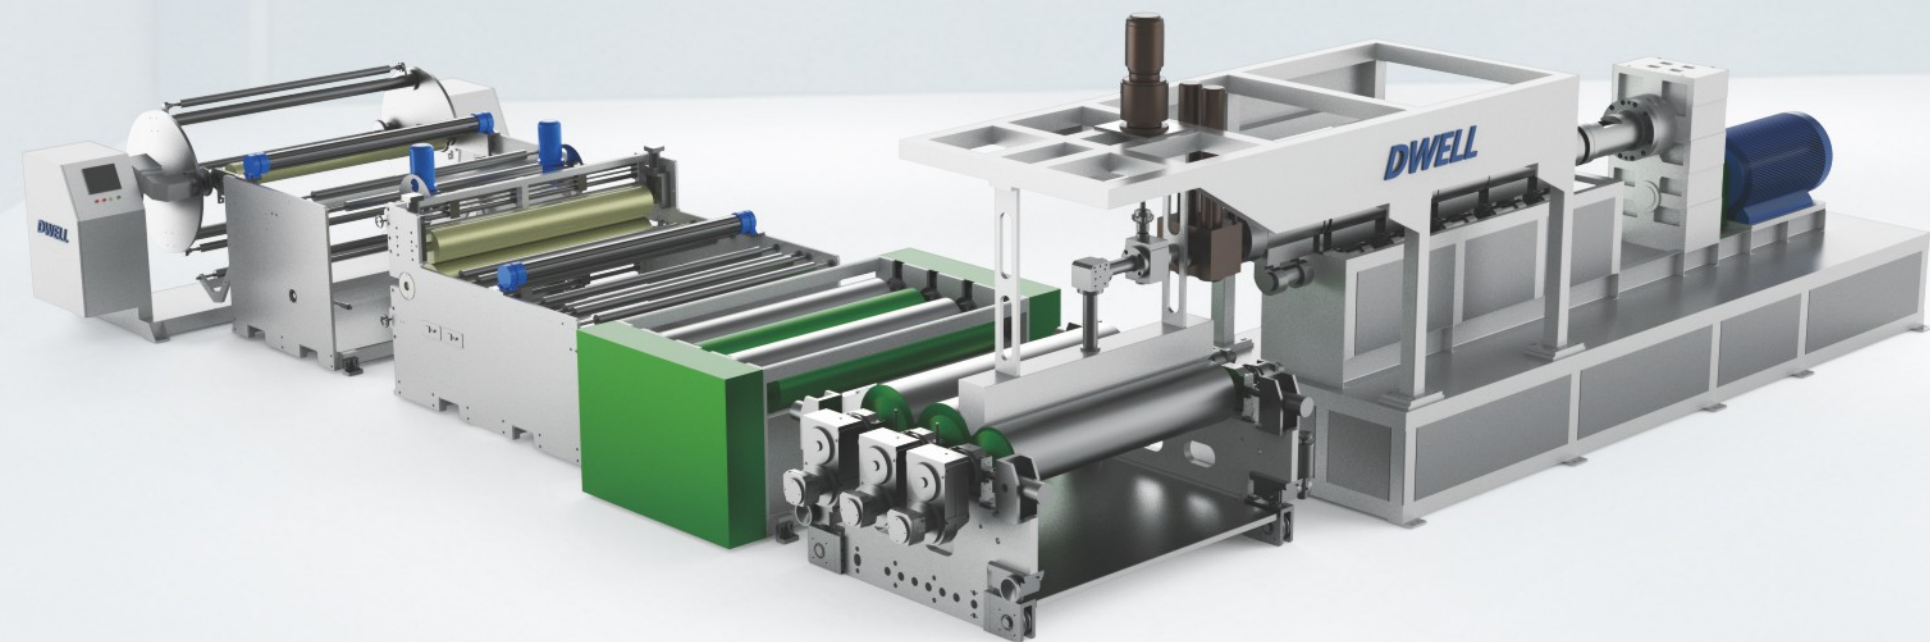

TPU(热可塑性聚氨酯)薄膜是在TPU颗粒料的基础上,通过流延工艺制成的薄膜。

TPU薄膜拥有卓越的高张力、高拉力、强韧性和抗老化的特性,并且无毒环保,耐磨抗腐,防霉抗菌,生物相容等优良特性。目前,TPU已广泛应用于鞋材、成衣、充气玩具,水上及水下运动器材,医疗器材,健身器材,汽车座椅材料、雨伞、皮箱、皮包、车衣覆膜等。

TPU (Thermoplastic Polyurethane) film is a thin film made by tape casting process based on TPU particles.

TPU film has excellent characteristics of high tension, strong toughness and anti-aging, and is non-toxic, environmentally friendly, wear-resistant, anti-corrosion, mildew resistant, antibacterial, biocompatible and other excellent characteristics. Currently, TPU has been widely used in shoe materials, ready-to-wear, inflatable toys, water and underwater sports equipment, medical equipment, fitness equipment, car seat materials, umbrellas, leather cases, leather bags, car clothing film covering, and so on.

## TPU流延膜生产线 TPU Casting Film Production Line

### Parameters 技术参数

型号 Model	TPU流延膜生产线 TPU Casting Film Production Line		
挤出机编号 Extruder Model	DWS90/36	DWS120/36	DWS150/36
最大宽度 Maximum Products Width	1600mm	1600mm	2000mm
最大产量 Maximum Output	180kg/H	300kg/H	500kg/H
产品厚度 Products Thickness	0.02mm-2mm	0.02mm-2mm	0.02mm-2mm

备注: 以上规格参数如有变更, 恕不另行通知。Note: The specifications are subject to change without prior notice.
